

June 13, 2022

Greetings!

We had our first Forest Glen residents (2 residents) test positive for COVID in almost 18 months, unfortunately. While a rapid test was used to find any potential rapid residents, a PCR lab test was sent out today to confirm that status. The residents were rapid tested Sunday in response to a positive staff person on Friday. We did not receive those staff Friday results until Sunday.

All the other Forest Glen residents were rapid tested today and were negative. All residents were PCR'd today.

Meadow Wood is now out of "outbreak" status. Staff will continue to test twice weekly.

The nursing home will be out of outbreak status on Saturday. Residents were tested today and staff will continue to test twice weekly.

Visitation is available at all programs but know that if you choose to visit a resident at Forest Glen, you could potentially be exposed to the virus. Outdoor visits are always safest. Please plan to use that venue if possible.

More to come!

Please continue to pray for GSS and our nation.

Thank you,

Deb Captain
